PROJECTS

Chat Application | Oct 2025

Developed a responsive website for users to exchange messages and communicate with each other in real-time. Utilized technologies such as HTML, CSS, JS and integrated with a backend database MySQL. Focused on improving user experience and ensuring mobile compatibility.

Food Delivery Website | Jan 2025

Web development project using HTML, CSS, JavaScript, and MySQL for online food ordering and delivery.

- Developed a responsive platform allowing users to browse menus, place orders, and make secure payments.
- Integrated with a backend database (MySQL) to manage customer and order data efficiently.
- Focused on enhancing user experience and ensuring mobile compatibility across devices.

E-Waste Management System | March 2026

Developed a web-based platform to manage and track electronic waste collection and recycling processes.

- Built using HTML, CSS, JavaScript, and MySQL for efficient data management.
- Enabled users to register e-waste items and request recycling services online.
- Designed a responsive and user-friendly interface for better accessibility.
- Focused on promoting environmental awareness and sustainable waste management.

Safety Web Application | 2025

Created a safety-focused web application to provide emergency support and awareness features.

- Developed using HTML, CSS, JavaScript, and backend database integration.
- Implemented responsive design for mobile and desktop compatibility.
- Improved usability with a clean UI and interactive features.
- Focused on enhancing user safety and quick access to important information.

CORE COMPETENCIES

- Technical: HTML, CSS, JS, Python, Node JS
- Soft Skills: Leadership, Team Work & Collaboration
